

Project CY 8609

Task

1. Describe the technical facility located vic:

SG1A

2. Within the following ten year period determine if and when any "special events" occur:

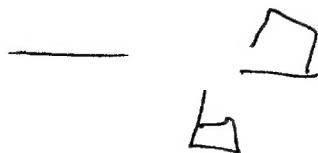

* Note: If you do find any "special events" - - - subsequent sessions will be focused on each separate "special event."

Reflected to persons on January 1925

Plans were to be the same disruption
externally disrupted. Unpleasant
disrupts. Negative factors about
disruption. Possible force
involved in destruction.

Extend to dissidents.

Had been present but sat down as
it disassembled & demolished.

People gone. Except for 3-4 there
was nothing anything. People avoid
place. Over, in

As for Chills

Site involves a facility with an overall purpose to produce something (not necessarily physical). A smaller structure w/in facility compound ~~does~~ produce something perhaps hazardous. Activity/operation picked up at site ca. late '83, increased, then decreased last quarter 1984, then increased again at high level. Idea that facility has been here along time but is now being "converted" or is host to a new sort of project than what it was originally intended for. ^{may have to do w/ a stage} (See p. 9) that does something, ^{intends} perhaps involving high temperature fluxes, or whatever. Sense of physical + information isolation, is like a S.A.P. here might be.
